Have ended nepotism in govt jobs: PM

Recruitments made faster, transparent, unbiased in 9 years

EXPRESS NEWS SERVICE New Delhi, May 16

CHANGES AND SIMPLIFICATION brought in by the government in its system of recruitment has ended nepotism and corruption, Prime Minister Narendra Modi said on Tuesday while giving out over 71,000 appointment letters to new recruits in various central departments.

Speaking at the fifth instalment of 'Rozgar Mela', the Prime Minister said from applying for government jobs to going through the recruitment process, the entire system has become online, omitting many hurdles, including the old uncertainty of whether an application sent by post reached the intended recipient. "In the last nine years, the government has prioritised the recruitment process by making it faster, transparent and unbiased," he said.

Talking about the future possibilities in the country's employment ecosystem, Modi referred to his meetings with corporate bigwigs — CEOs of Walmart, Apple, Foxconn and Cisco — who expressed "unprecedented positivity" about India.

He said it will be an opportunity for the youth working in the logistics sector. "The EPFO data since 2018-19 shows that more than 45 million people have got employment in the formal sectors," he said.

Speaking of the encouragement to the "startup

culture" under his government, Modi said the number of startups in India is over a lakh today; nine years ago their number was around 100. "The startups have employed at least 10 lakh youth," he said.

Highlighting the developmental progress achieved in the last nine years, Modi cited the length of rural roads that has expanded to 7,25,000 km, while the number of airports has surged from 74 to nearly 150 during the NDA rule.

Additionally, the government's housing scheme for the underprivileged has played a pivotal role in generating numerous employment opportunities while building more than 40 million pucca homes. In the education sector, Modi shared that the number of universities has risen from approximately 720 in 2014 to 1,100 at present. Similarly, the count of medical colleges has surged from 400 to 700, further enhancing educational opportunities for aspiring healthcare professionals.

Speaking at the event, Union minister Jitendra Singh said 25 years later, when the country will celebrate 100 years of Independence, the new recruits of today would have the opportunity to say they received their appointment letters from Prime Minister Narendra Modi. Aiming to provide 1 million government jobs, the Rozgar Melas were held at 45 locations across the country where recruitment took place across central government departments and states /UTs supporting the initiative.

Altman says concerned about AI used to compromise elections

An OpenAI staffer recently proposed the creation of a US licensing agency for AI, which could be called the Office for AI Safety and Infrastructure Security, or OASIS, Reuters has reported. OpenAI is backed by Microsoft. Altman is also calling for global cooperation on AI and incentives for safety compliance. —REUTERS

Russian firms investing rupee surplus in govt bonds

Separately, Mehta said the IBA has requested the Reserve Bank of India (RBI) for more time to prepare for the expected credit loss-based provisioning model.

"The banking sector is already geared up, and a few banks have already developed their systems and put their data in place on which they can design their ECL-based risk models. We hope the system adopts it quickly," Mehta said, adding that the IBA has requested one more year from the RBI.

Earlier this year, the central bank proposed, in a discussion paper, to transition from an "incurred loss" model to an "expected credit loss" model for loss provisioning. At a time when the central bank has been

advocating for the adoption of environmental, social and governance (ESG) norms, Mehta argues that there must be a sectoral approach.

He stated that the main objective is to understand how the international ESG framework can be customised to Indian requirements. The most important aspect is creating a system to define "green" in relation to various sectors since all sectors cannot be treated in the same manner.
